- 5) The Supreme Court of India, New Delhi
- 6) The Minister of Drinking water and sanitation, Govt of India, New Delhi
- 6) United Nations Water, Geneva, Switzerland

Dear Responsible,

Sub: REMOVE ENCROACHMENTS FROM FTL OF OSMAN SAGAR & RESUME DRINKING WATER FROM HERITAGE OSMAN SAGAR & HIMAYAT SAGAR TO HYDERABAD - DO NOT DENY HYDERABADIS FUNDAMENTAL RIGHT TO WATER FROM VICINITY OF HYDERABAD

Ref: Our email of 17 January 2019 appended below; & Official FTL map of Osman sagar dated 18.6.2013;

None of the officials have responded thus far;  
Further to our representation of 17 January 2019,  
PFA FTL map of Osman Sagar and find the encroachment ORO sports village in the official FTL map, but waiting to be evicted since June 2013 even after official recognition as encroachment.

Eviction of encroachments from the twin drinking water sources, Osman Sagar & Himayat Sagar needs to be done on war footing and drinking water supply to be restored to the Hyderabadis. Hyderabadis yearn for the sweet waters of Gandipet(Osman sagar)

Government of Telangana is giving most perilous and absurd statements in the courts and to the public that 'as drinking water to Hyderabad city is brought from 250kms away from river Godavari and Krishna, we need not preserve the water bodies for drinking water needs of Hyderabad'. The once water self-sufficient Hyderabad is now brought down on its knees made dependent on water pumped from across the districts. This is unacceptable as per sense, science and law.

We await earliest action in accordance with natural principles of justice, application of mind, rule of law and constitution of Sovereign Socialist Secular Democratic Republic of India

Hyderabad 17 January 2019

To

The MD  
HMWS&SB, Hyderabad

Dear Managing Director, Hyderabad Water Board,

Sub: ORO sports village inside Osman Sagar, the Drinking Water Source of Hyderabadis

Ref: 1) Osman Sagar FTL Map dated 18.6.2013 signed by GM(engineering), HMWS&SB, Hyderabad; Dy. GM(Engineering) & Manager(engineering)Osman sagar section given to SOUL.

2) satellite imagery of 2010, 2011, 2013 and latest that show the gradual landfill and construction of ORO sports village right inside the FTL of Osman Sagar;

Please refer to our below message dated 25 July 2018 addressed to you after meeting Director Technical at your head office, expressing our anguish regarding the fact that Hyderabadis are not supplied drinking water from Osman Sagar and Himayat Sagar;

Secondly, the encroachments fully acknowledged thru official maps are still not evicted. Enclosed chronological satellite images from 2011 to 2018 overlaid with FTL boundary depicts landfill, compound wall, and ORO sports right inside the drinking water resource of Hyderabad, under your regime.

We expect your prompt action plan on restoration of Osman Sagar in terms of its original water spread, in terms of its holding capacity, and in terms of potable water. Secondly, action taken on the officials who thru their active commissions and omissions, not conducted office in good faith, and done dereliction of duty and without application of mind, wisdom and ethics, have allowed the ORO sports encroachment.

Dear MD, Do remind all your officials that they are all on the pay-roll of the citizens and residents of Hyderabad; that they are bound to duty and rule of law; that they are not bound to political leaders, corporators, MLAs, MPs, Ministers.

Await your earliest revert on the matter.

best
