Hyderabad 27th June 2017

To
The Chairman
National Human Rights Commission
New Delhi

Dear Sir,

Sub: **Highly contaminated Life threatening Nacharam Lake @ 17°25'4.38"N 78°33'19.11"E and many other lakes in Hyderabad and adjacent districts**

Ref: Attached pic album depicting **chemical-polluted lake destroying ,, downstream lake Nalla cheruvu and pouring into Moosi nadi which is tributary to Krishna Nadi - Krishna Nadi is drinking water source & irrigation source**

Kindly peruse the attached picture album. We register our grievance with your commission, with full trust that an early public hearing be conducted on all the lakes under GHMC jurisdiction.

GHMC/SE HL&WBM(Greater Hyderabad Municipal Corporation/Superintending Engineer, Hyderabad Lakes & Water Bodies Management) do not have any action plan to contain the pollution of the 179 lakes in its jurisdiction. it simply diverts pollution to another lake at best, spending huge public money, thus proliferating alarming pollution levels on a continuum.

And, GHMC/SE HL&WBM does not respond to our representations in spite of suggesting alterantive methodologies to save lakes of Hyderabad.

Right below for your ready reference is google imagery showing path(red line) of foamy chemicals flowing thru outflow channel from HMT nagar nacharam cheruvu to Nalla cheruvu.

best
Lubna, Jasveen, Sashika, Bhuvana,
Team SOUL
